

COLEMAN MALLICOAT

Cybersecurity Specialist – Micro-Segmentation

Columbia, MO | (636) 669-4157 | coat84@gmail.com

SUMMARY

Cybersecurity specialist with 13+ years of enterprise IT, network security, and DoD systems engineering experience. Proven ability to lead micro-segmentation initiatives across large, distributed environments spanning 55+ remote sites and 1,200+ endpoints. Expertise in identity-based access control, ACL policy design, agent deployment, segmentation mapping, Zero Trust Architecture, metadata integration, and NIST 800-53 alignment. Supervisor available upon request.

CORE COMPETENCIES

Micro-Segmentation • ACL Policy Design • Zero Trust Architecture • NGFW • Traffic Analysis • Segmentation Zones • Agent Deployment • Metadata Integration • Identity-Based Access Control • SIEM Integration • NIST 800-53 • Incident Response • Linux/Windows Systems • PowerShell • Bash • Python

PROFESSIONAL EXPERIENCE

Senior IT Network & Systems Administrator

Warrenton Oil Company — Truesdale, MO

Jul 2021 – Apr 2023

- Led identity-based access control initiatives using FreeRADIUS, SSL, and MFA to prevent lateral movement across 55 remote sites.
- Designed segmentation boundaries through VLAN architecture, ACLs, and least-privilege policies.
- Analyzed network communication flows across 1,200+ endpoints to define segmentation zones and enforce Zero Trust principles.
- Managed endpoint agents for authentication, monitoring, logging, and policy enforcement.

- Integrated syslog and metadata into SIEM platforms for correlation and incident response.
 - Ensured alignment with NIST 800-53 AC, SC, and SI security controls.
 - Supervisor available upon request.
-

IT Instructor / Systems & Monitoring Engineer

Ranken Technical College — Columbia, MO

Apr 2023 – Present

- Built segmentation labs simulating micro-segmentation, Zero Trust enforcement, and ACL boundary validation.
 - Developed PowerShell, Bash, and Python automation scripts for segmentation/ACL integrity testing.
 - Taught Zero Trust Architecture, SIEM integration, Linux/Windows security, and NIST security frameworks.
 - Integrated Nagios, SNMP, and syslog telemetry with SIEM-style dashboards to demonstrate segmentation violations and access anomalies.
 - Supervisor available upon request.
-

MILITARY EXPERIENCE

Instructor & Systems Supervisor — U.S. Army (53rd Signal Battalion)

U.S. Army Cyber Center of Excellence

2014 – 2021

- Enforced segmentation boundaries using ACLs and identity-based access controls across DoD SATCOM and enterprise systems.
- Analyzed communication/traffic flows to identify unauthorized lateral movement attempts.
- Maintained compliance with DoD RMF and NIST 800-53 security controls while supervising 60+ personnel.

- Coordinated network, server, and security teams to deploy agents, integrate metadata, and enforce segmentation boundaries.
 - Responded to segmentation violations, unauthorized access attempts, and anomalous traffic patterns.
 - Supervisor available upon request.
-

EDUCATION

MBA – Information Technology Management, Western Governors University (2023)

MS – Cybersecurity & Information Assurance, Western Governors University (2022)

BS – Network Operations & Security, Western Governors University (2020)
